

# Membrane Switch

**Membrane switches** are thin, flexible electronic switches that are typically low-voltage and are continually replacing the older push-button types of switches. They are either constructed with tactile or non-tactile contacts.

*Membrane switches often provide the sole interaction between your customers and the technology you provide them.*

## Membrane Switches:

- ✓ All Pantone Colors available
- ✓ Polyester or Polyimide circuit material
- ✓ Clear and frosted windows
- ✓ Flat or embossed windows
- ✓ LED attachment
- ✓ Switch attachment (metal domes)
