

WE DESIGN AND MANUFACTURE CIRCUITS

Custom flexible circuits and printed circuit boards delivered on time.

Tramonto Circuits is a turnkey global provider of high-quality flexible and rigid printed circuit boards (PCBs) backed by superior customer support. Our prototyping, custom box builds and full-production manufacturing facilities have been serving the medical, transportation, aerospace and industrial / consumer industries since 2008.

Tailored to accommodate every need from design conception through volume production and fulfillment, Tramonto Circuits partners with you every step of the way for your business solution needs!

If you need to build or design anything with electronics, Tramonto Circuits is the team to depend upon.

About Us

(651) 777-7665
www.tramontocircuits.com

As a leading electronics manufacturer of high-quality circuits and assemblies to OEM and contract manufacturers, Tramonto Circuits provides flex/rigid PCB and flexible heater circuits to meet the business demands of any business, medical or private company.

Our solid reputation as an electronics manufacturing company is backed by the feedback we receive from our customers. Known for outstanding quality, product durability, exceptional customer support (before, during and after product development), dependability and quick fulfillment with 99.4% on-time delivery.

Tailored to accommodate every need from design conception through volume production and fulfillment, Tramonto Circuits partners with you every step of the way for your business solution needs!

SERVICES AND CAPABILITIES

Tramonto Circuits provides the latest circuit designs and innovative technology to help your business stay competitive in today's market. Whether a simple, flexible circuit application or a more complex design, Tramonto Circuits understands that every application is unique and not one size fits all when it comes to circuitry solutions.

Our Services

Electronic Component Manufacturing -

Turn-key support, component sourcing, prototype design & fabrication.

Electronic Design and Manufacturing -

Printed circuit boards, flex circuits, rigid/flex and flexible heater circuits solutions.

Electronic Assembly QA -

Electronic component builds and timely manufacturing with a low defect rate.

Prototyping Services -

Electronic prototype assembly designed to meet your technological needs.

Inventory Management -

Kanban Inventory Management (KIM) System and product stocking program and production.

Electronic Component Procurement -

Source add-on electronic components required for subassembly needs.

Electronic Component Testing -

Pass / fail determination on finished PCBs before being shipped for customer delivery.

Our Capabilities

Flexible Circuits - flexible circuits and electronic components for any design requirement

Flexible Heaters - solutions that reliably meet needs for extreme harsh and cold climates.

Printed Circuit Boards- circuit board applications used in everyday technology (i.e. motherboards, microwaves, smoke detectors...)

Circuit Assembly - Turnkey assembly, testing, custom box builds, strain relief techniques and heat sink attachment.

Design Services- From designing and testing all the way through design for manufacture (DFM) and production.

The right technology can make all the difference for your business. That's why we offer a diverse range of flexible circuit solutions, so you're always able to maintain that competitive edge.

Our Process

WHERE WE ARE

Headquartered in Minnesota, USA, our extensive technical knowledge and ongoing investment in state-of-the-art manufacturing technology means you can count on us to deliver high quality circuits and custom build at competitive prices - no matter how big or small your business demands.

GET A FREE DESIGN FOR MANUFACTURING ANALYSIS

We will review your circuit files free of charge and make suggestions for change to meet current IPC standards for circuit manufacturing. No obligations and no strings attached.

- Achieve a higher success rate with first design
- Gain confidence that your files meet IPC industry standards
- We will provide helpful guidance for circuit designers
- We will return updated Gerber files for clarity
- We will be available to answer any questions afterward
